

SIERRA LEONE LIBERIA YOUTH LEARNING VISIT

FEBRUARY 9-23, 2024

This program implemented through the Presbyterian church (U.S.A.) works with young farmers to build a one year reserve of food. On this visit we will meet local partners and rural community groups. Opportunities will be provided to see the activities and interact with program participants and other stakeholders to discuss the impact of the program on local food security. These villages are in rural areas in various parts of two countries. This is the dry season and agricultural activities are limited to vegetable gardening and land preparation for the upcoming crop production season.
